Steadvale Manufacturing

Steadvale stands for exceptional customer service, for over 30 years we have delivered high-quality engineering expertise in Servicing, Parts and Manufacturing to our valued customers' world-wide.

Steadvale Manufacturing is the Engineering expertise and the hub of the organisation. It supports the 'Servicing' and the 'Parts' divisions of the business and along with significant new investment it has exciting growth targets for the future.

We have recently invested in the workstation running Auto Cad 2012 and Mechanical Desktop, together with the ESPRIT Cam Software programming. This system is linked to the Director Unit within the shop floor and the programmes are entered from this unit to the Machine Control. Operators can edit and re-programme on the shop floor which minimises any downtime.

STEADVALE HAS AN EXTENSIVE MANUFACTURING PLANT LIST, DETAILS AS FOLLOWS;

- CNC turning / CNC milling
- Conventional turning / milling
- Horizontal boring
- Vertical boring
- Cylindrical grinding
- Surface grinding
- Honing
- Lapping

Our Manufacturing skills and expertise allows Steadvale to tackle most projects contact us now to discuss your requirements.

'BOC see Steadvale as a key part of our internal team'

BOC, GLASGOW, SCOTLAND

In-House and Sub-Contract Machining

Steadvale Manufacturing can offer the benefits of their in-house engineering expertise to resolve many Customer issues. The flexibility of the manufacturing equipment and the engineers skill-set allows manufacturing to solve problems in the core services of compressors and parts, while looking at opportunities in the new developing technologies of Renewable Energy amongst others.

OTHER ON-SITE SERVICES INCLUDE;

- Spray painting
- Caustic cleaning and de-scaling
- Steam cleaning
- Pressure testing
- Mig/stick welding
- Shot blasting

Reverse Engineering

Steadvale Manufacturing have a unique capability to take 'old' parts now obsolete from the original manufacturer and produce high quality 'new' parts which are guaranteed, made in the UK and match the original specifications plus the customer's requirements on both price and delivery.

Steadvale Servicing

Our Servicing division provides our core services of planned maintenance for Compressors and ancillary equipment, such as Dryers. Our maintenance contracts are individually tailored to suit the customer's needs and we minimise the disruption caused by equipment breakdowns.

Compressor Product Machining

Steadvale reconditioning services are of exceptional quality and precision. Restoring all types and makes of Compressor valves back to their original specification.

AN EXAMPLE OF A TYPICAL VALVE REFURBISHMENT PROCEDURE, INCLUDES;

- Machining of valve seats
- Replacement of internal components, such as valve plate, Cushion plate and springs
- Assembly testing
- Quality inspection
- Protective packaging and secure delivery

Paint Workshop

As part of our ongoing expansion plans Steadvale have invested in our Paint Workshop to ensure we offer our customers a complete 'one-stop-shop' service.

Steadvale Parts

Our Parts division stock an extensive range of parts and hardware for Reciprocating Compressors, Rotary Screw Compressors and Dryers, this covers the full range of aftermarket replacement parts for all the major manufacturers.
